Issues per page

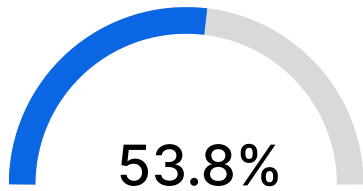

This section highlights audit issues across each page of your site, covering accessibility, performance, quality, and SEO. By identifying problems like missing metadata, accessibility violations, slow load times, and compliance gaps, WebYes helps you prioritize fixes based on each page's severity and visibility.

 Accessibility	 Performance	 Quality	 SEO
---	---	---	---

Page URLs	Total Issues	Critical Issues				
https://delandgibson.com	33	15	56.00%	82.00%	78.00%	50.00%
https://delandgibson.com/group-benefits	32	16	55.00%	90.00%	78.00%	85.00%
https://delandgibson.com/risk-assessment-quote	32	15	51.00%	89.00%	78.00%	100.00%
https://delandgibson.com/business-services	30	14	53.00%	93.00%	78.00%	100.00%

Robust

4.1 Compatible

Guideline	Level	Affected pages
4.1.2 Name, Role, Value	A	4

Performance

This section analyzes how efficiently your site loads and responds. WebYes reviews key metrics like page load speed, time to first byte (TTFB), largest contentful paint (LCP), and first input delay (FID). Better performance means faster access, higher engagement, improved SEO, and lower bounce rates.

Quality Issues

Issues	Priority	Affected pages
Issues were logged in the `Issues` panel in Chrome Devtools	Low	5
Uses third-party cookies	Low	5

SEO

This section identifies technical and content-related issues that affect your site's visibility in search engines. WebYes checks for missing or poorly structured metadata, broken internal links, improper heading use, and thin content. Fixing these issues improves crawlability, indexation, and search rankings.
